Brief History since the Last Comprehensive Evaluation:

April 2021

Based on review of the comprehensive report of the evaluation team and the college's written response to the team report, the Council granted accreditation of New York College of Podiatric Medicine through April 2026. On-site re-evaluation may be expected during the fall of 2025 or early winter 2026. The maximum first year class enrollment for the institution is 109.

Following review of the on-site team report, the Accreditation Committee and the Council determined that the college is in noncompliance with one standard and requirement from CPME 120, *Standards and Requirements for Accrediting Colleges of Podiatric Medicine*: Requirement 1.D (Ongoing Evaluation Process). The college is required to submit a progress report for consideration at the October 2021 meetings of the Accreditation Committee and the Council that includes the college's progress in correcting the area of noncompliance.

October 2021

Following review of the progress report, the Accreditation Committee and the Council determined that the college remains in noncompliance with Requirement 1.D (Ongoing Evaluation Process) from CPME 120, *Standards and Requirements for Accrediting Colleges of Podiatric Medicine*. The college is required to submit a progress report for consideration at the April 2022 meetings of the Accreditation Committee and the Council that includes the college's progress in correcting the area of noncompliance.

The college must take appropriate action to bring itself into compliance with the standards and requirements. Since the Council first identified the NYCPM as being in noncompliance with standard and requirement 1.D in April 2021, the college has until April 2023 to come into compliance with the requirement unless an extension for good cause is requested and granted. It is very important to note that the college is at risk for probation and subsequent withdrawal of accreditation if the area of noncompliance is not corrected.

Concerning the substantive change request, the Accreditation Committee and Council reviewed and granted preliminary approval of the substantive change request until such time that CPME can conduct an on-site evaluation when the affiliation is operational.
